[BUDGENT CONSTRAINTS AND WALRAS? LAW](#)

EckalbarThe central idea with respect to budget constraints is that sources of purchasing power = uses of purchasing power or the value of what the trader enters the market with = value of what trader leaves market withThe first budget constraint you normally see (maybe in econ 101) is something like $income = P_x X + P_y Y$, where X and Y are the quantities bought of two goods, P_i is the price of goo...
